DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Price (U.S. 6,224,514). Price discloses an exercise device as best understood that can provide an oscillating resistive force in response to a force exerted by an exerciser. With respect to claim 2, as best understood by the Examiner, Price teaches a resistive force means operable for providing oscillatory resistive force that varies in, contact means in mechanical connection to the resistive force means, with the contact means (5) receiving a portion of the body of the exerciser enabling the exerciser to exert an applied force with the body portion in opposition to the resistive force through the range of motion. With respect to claim 3, as broadly claimed Price teaches a weight connected to the end of the cable. Referring to claim 4, Price teaches the cable passing over a pulley (34) rotatably mounted on an axle (35) disposed between the force resistive means and contact means. With respect to claim 5, Price teaches the pulley has portions that are tilted (38, 39) with respect to the axis of rotation. With respect to claims 6-7, as broadly read, a cam can take many shapes, and in this light, Price teaches the pulley being cam shaped.
